

IHSAN ANWAR

Junior PHP Developer • Full Stack (MERN) • Instructor
Islamabad • ihsan.anwar4321@gmail.com • +92 327 6508773
[Portfolio](#) • [GitHub](#) • [LinkedIn](#)

Full Stack Developer with **4 shipped projects** — MERN, PHP/MySQL, and a live SaaS platform. Load-tested to **1,400 concurrent users** at **1,037 req/s**. Mentoring 17+ students while building production systems.

EXPERIENCE

Full Stack Developer & Instructor

Oct 2025 – Present

ProgrammersLab

Rawalpindi

- Working as a **Full Stack Developer**, building and maintaining production web applications for the institute.
- Working as an **Instructor**, teaching React, Node.js, and PHP to students.

PROJECTS

Golden Skills — Learning & Earning Platform MERN · Redis · PM2 · Nginx · Hostinger VPS

- Built from scratch and deployed to production — solo-architected a full MERN platform with course management, task assignment, referral system, PDF certificate generation, and role-based access control.
- Optimized MongoDB queries with composite indexes and `.lean()`, cutting latency by **57%** (3.5s → 1.5s); implemented JWT auth and 3-tier rate limiting.

ProgrammersLab — Full-Stack Institute Platform PHP · MySQL · jQuery · Bootstrap · bcrypt · CSRF

- Rebuilt static site into a complete MVC system: filterable course catalog (8 categories), AJAX contact form, and multi-file enrollment pipeline with server-side file validation — zero extension-spoofing risk.
- Built hardened admin panel: bcrypt (cost 12), IP rate limiting (5 attempts / 15 min lockout), session fingerprint hijack detection, full CSRF protection, and complete `admin_logs` audit trail.

Cesstor — Family Tree Web App React 19 · PHP · PostgreSQL · Jitsi Meet · Vite

- Built a full-stack ancestry platform for Pakistani tribes with paginated family tree visualization, user submission workflow, and admin review/approval system with auto-generated family record codes.
- Implemented recursive PostgreSQL CTEs for ancestry traversal, JWT-based auth, generation-type calculation from birth year, and Jitsi Meet live video integration.

GetReach — Personal Project — Social Growth SaaS React 19 · PHP · MySQL · JWT · Framer Motion

- Personal mini-SaaS — built a full-stack SMM reseller panel for social media growth (TikTok, Instagram, YouTube) with user dashboard, admin panel, order management, EasyPaisa/JazzCash fund deposits, and support ticket CRM.
- Engineered automated pricing engine (markup multiplier × USD → PKR), custom PHP HS256 JWT (no library), file-based IP rate limiter, PHPMailer password-reset, and live PakFollowers API integration with revenue analytics.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML5, CSS3, Bootstrap, jQuery, Framer Motion, Vite

Backend: Node.js, Express 5, PHP, Python (basic), REST API Design, JWT Auth, bcrypt, Nodemailer, Rate Limiting

Databases: MongoDB Atlas (Mongoose), MySQL, PostgreSQL, Redis (ioredis, TTL caching)

Tools & Deployment: Git, Postman, Vercel, Hostinger VPS, PM2, Nginx

AI-Assisted Development: Use Claude and other AI tools daily for scaffolding, debugging, and research — while owning architecture, code review, and final logic myself

Concepts: MVC, CRUD, RBAC, SaaS Architecture, Load Testing, Performance Optimization

EDUCATION & CERTIFICATIONS

BS Computer Science

2024 – 2028 (Expected)

Virtual University of Pakistan

Remote

- 5th Semester • Working full-time alongside degree

ICS — Computer Science (Physics)

2022 – 2024

IMCB H-9 Islamabad

Google Cybersecurity — Coursera • 2025 Full Stack JavaScript Developer — IBM / Coursera • 2025
